NATURE IN MY HAND – (FOR MY FUTURE)

Every day our Earth is a little more polluted. Many species are disappearing. Many live species are also threatened with extinction. We created a project because from these reasons. During the last year, we have do many work with our European partners. All together we have made efforts to developed awareness of our students. Humans are the ones that cause the greatest damage to nature. As humans become conscious, the damage to nature can be reduced. That's why we decided to keep in our project this year. Unlike you last year, we've expanded the scope of the subject. We have included students with more effective applications.

We are happy to be in this project and we wanna say good bye as 4th grade.

This is my teacher friend Süleyman.He helped me in this project and he wanted to say the benefits of the project for his students.he says:

-They have more self confidence anymore and they are eager to speak english.they are more responsible and want to take action about problems around them.They work collaboratively.They want to be in etwinning projects from now on.

Then he decided to be a member of etwinning thanks to you.
